- ◇ Pregnancy
- ◇ Childbirth
- ◇ Postnatal Recovery
- ◇ Lymphodema
- ◇ Menstrual Pain
- ◇ Urinary Disorders
- ◇ Muscle Tension and Joint Instability
- ◇ Post-operative care

K-Taping® Therapy is a non-pharma treatment method used by Midwives, OB-GYNs, Physical Therapists and other Women's Health professionals in Europe, Asia and other parts of the world. A comprehensive course covering applications for supportive therapy during pregnancy, after childbirth and for other common gynecological conditions is now being offered to in the U.S. by the K-Taping® International Academy.

Course participants will be taught proper taping techniques for improving muscle function; supporting joints; reducing pain; and stimulating the lymphatic system.

The K-Tape® brand was developed in Germany and is recognized world-wide for its premium quality. High quality raw materials and specialized manufacturing processes ensure safety, comfort and longest wear time of any tape on the market. K-Tape® My Skin is a breakthrough in tape color technology with a revolutionary skin tone matching system.
