

K-Taping® for Speech and Language Pathology

K-Taping® Therapy is a non-pharmaceutical treatment method used by health professionals around the world. A comprehensive course developed specifically for Speech and Language Pathologists is now being offered in the U.S. by the K-Taping® International Academy.

Course participants will be taught theory, general principles and proper methods for muscle, ligament, fascia, Cross-Tape and combination taping techniques. Courses are taught by experienced instructors who are trained and certified by the Academy.

Learn effective taping techniques for treatments including:

- *Facial Nerve Paralysis*
- *Dysphagia*
- *Mandibular Stabilization*
- *Hypersalivation*
- *Trigeminal Neuralgia*
- *Hypotonia of the mouth*
- *Neurovegetative Dystonia*
- *Temporomandibular Joint*
- *Laryngeal Mobility*
- *Lip and Mouth muscles*
- *Respiratory Support*
- *and more...*

Class sizes are limited to allow personalized, hands-on instruction. This practical training allows participants to begin using these treatments as soon as they complete the course. The detailed color workbook contains all presented techniques and indications. The workbook is an extensive practical handbook for your continued reference.

K-Tape® was developed in Germany and is recognized world-wide for its premium quality. Single source U.S. cotton, proprietary adhesive and specialized manufacturing processes developed in Germany ensure safety, comfort and the longest wear time of any tape on the market.

K-Tape® My Skin is a breakthrough in tape color technology. For visible applications on the face, neck and other parts of the body, this new skin tone matching tape is a revolutionary development.
