- ◇ Drainage of the upper and lower extremities
- ◇ Drainage of the Face
- ◇ Drainage of the Trunk
- ◇ Drainage of the Joints
- ◇ Stemmer's Sign in the Hand and Foot
- ◇ And much more

## K-Taping for Lymphatic Drainage

K-Taping® Therapy is a non-pharmaceutical treatment method used by health professionals around the world. A comprehensive course developed specifically for clinicians who practice lymphatic techniques is now being offered in the U.S. by the K-Taping® International Academy.

In this one day course participants will be taught theory, general principals and proper methods for lymphatic tape applications. Crosstape® and combination taping techniques will also be covered. All K-Taping courses are taught by experienced instructors who are trained and certified by the Academy.

Class sizes are limited to allow personalized, hands-on instruction. This practical training allows participants to begin applying treatments to patients as soon as they complete the course. The detailed color workbook contains all presented techniques and indications. The workbook is an extensive practical handbook for your continued reference.

K-Tape® was developed in Germany and is recognized world-wide for its premium quality. High quality U.S. grown cotton, a proprietary adhesive and specialized manufacturing processes developed in the E.U. ensure safety, comfort and the longest wear time of any tape on the market.

K-Tape® **My Skin** is a breakthrough in color technology. For visible applications on the face, neck and other parts of the body, this new skin tone matching tape is a revolutionary development.
